CONTENTS

Volume 85, Number 1, November 14, 1978

AUTHOR INDEX, Volume 85, Number 1, November 14, 1978	ii
E. BERTOLI, G. PARENTI-CASTELLI, A. M. SECHI, G. TRIGARI, and G. LENAZ. A Requirement for Ubiquinone in ATPase Activity and Oxidative Phosphorylation	1
AJAY PANDE and YASH P. MYER. The Redox Potential of Horse Heart Cytochrome <i>c</i>	7
G. GATTI, B. CASU, and A. S. PERLIN. Conformations of the Major Residues in Heparin. ¹ H-NMR Spectroscopic Studies	14
MASAYUKI OHBA, RYO SATO, YUZO YOSHIDA, TOKUSO NISHINO, and HIROHIKO KATSUKI. Involvement of Cytochrome <i>P</i> -450 and a Cyanide-Sensitive Enzyme in Different Steps of Lanosterol Demethylation by Yeast Microsomes	21
YURI AOYAMA and YUZO YOSHIDA. The 14 α -Demethylation of Lanosterol by a Reconstituted Cytochrome <i>P</i> -450 System from Yeast Microsomes	28
ERMES MAGRI, MARGHERITA ZACCARINI, and ENRICO GRAZI. Does Protamine Dictate the Direction of Growth of the Actin Filaments?	35
H. KNEIFEL, F. SCHUBER, A. ALEKSJEVIC, and J. GROVE. Occurrence of Norspermine in <i>Euglena gracilis</i>	42
BERNARD BAYARD, JEAN-PIERRE KERCKAERT, and GERARD BISERTE. Differences in the Molecular Heterogeneity of Alpha-Fetoprotein from Uterus and Serum of Immature Rats	47
CHARLES A. HARRINGTON, DAVID C. FENIMORE, and ROBERT W. FARMER. Regulation of Adrenocortical Steroidogenesis by Cyclic 3'-5'-Guanosine Monophosphate in Isolated Rat Adrenal Cells	55
JUAN S. BONIFACINO, SUSANA H. SANCHEZ, and ALEJANDRO C. PALADINI. Solubilization of the Lactogenic Receptors from Rat Liver Microsomes	62
ANNA TAN-WILSON and GUNTER B. KOHLHAW. Specific, Reversible Inactivation of Yeast β -Hydroxy- β -Methylglutaryl-CoA Reductase by CoA	70
T. KUWATA, S. HANDA, A. FUSE, and N. MORINAGA. Effect of Glycolipids Detectable in Transformed Human Cells on Interferon Activities	77
RICARDO NORBERTO FARIAS, LILIA ELENA UNATES, HORTENSIA MORENO, CLARA PENA, and ALEJANDRO C. PALADINI. Human Growth Hormone Active Site for Membrane Cooperative Enzymes	85
PATRICIA C. PLESE and R. BRUCE DUNLAP. The Effect of Thiols on the Sulfhydryl Content and Nucleotide Binding of Thymidylate Synthetase	92
LAVERNE SCHIRCH and KLAUS D. SCHNACKERZ. Activation of Aposerine Transhydroxymethylase by Pyridoxal-5'-Phosphate Monomethyl Ester	99
JOHN C. SEIDEL. Chymotryptic Heavy Meromyosin from Gizzard Myosin: A Proteolytic Fragment with the Regulatory Properties of the Intact Myosin	107
LASHITEW GEDAMU and GORDON H. DIXON. Effect of Enzymatic "Decapping" on Protamine mRNA Translation in Wheat Germ S-30	114
CH. V. RAO, FRED R. CARMAN, JR., and ROBERT R. GORMAN. Prostaglandin E and F ₂₀ Receptors in Bovine Corpora Lutea: Relative Affinities of Products of Arachidonic Acid Metabolism by Cyclo-Oxygenase	125
L. L. HOUSTON. Effect of the Toxic Castor Bean Protein, Ricin, on the Phosphorylation Pattern of [³² P]-Labelled Ribosomes from Mouse L Cells	131
GWENDOLYN ROSS, DORIS DUNN, and MARY ELLEN JONES. Ornithine Synthesis from Glutamate in Rat Intestinal Mucosa Homogenates: Evidence for the Reduction of Glutamate to γ -Glutamyl Semialdehyde	140
H. JANSEN, T. J. C. VAN BERKEL, and W. C. HULSMANN. Binding of Liver Lipase to Parenchymal and Non-Parenchymal Rat Liver Cells	148
H. STEVEN WILEY and ROBIN A. WALLACE. Three Different Molecular Weight Forms of the Vitellogenin Peptide from <i>Xenopus laevis</i>	153
SONIA M. DE TOLEDO and FRANCISCO J. S. LARA. Translation of Messages Transcribed from the "DNA Puffs" of <i>Rhynchosciara</i>	160
W. POWELL-JONES, S. N. NAYFEH, and G. W. LUCIER. Translocation of 4S and 5S Forms of Estrogen-Receptors into Rat Liver Nuclei <i>in Vitro</i>	167
ALFONSO GONZALEZ-NORIEGA and WILLIAM S. SLY. Concanavalin A Mediated Uptake of Enzymes by Fibroblasts	174
A. M. DOSNE, C. LEGRAND, B. BAUVOIS, E. BODEVIN, and J. P. CAEN. Comparative Degradation of Adenylnucleotides by Cultured Endothelial Cells and Fibroblasts	183
SHARON A. BOYLAN and EUGENE E. DEKKER. L-Threonine Dehydrogenase of <i>Escherichia coli</i> K-12	190
JOY CONSTINE, ROBERT I. GLAZER, and DAVID G. JOHNS. Adenosine Deaminase Inhibitors: Differential Effects on Multiple Forms of Adenosine Deaminase	198
YUZURU MATSUDA, TERUHIKO BEPPU, and KEI ARIMA. Circular Dichroism of Fusarium Lipoyxygenase from <i>Fusarium oxysporum</i>	203
JAGA NATH SINGH GLASSMAN, CHARLES W. TODD, and JOHN E. SHIVELY. Chemical Deglycosylation of Carcinoembryonic Antigen for Amino Acid Sequence Studies	209
ALPHONSE GALDES, H. ALLEN O. HILL, IAN BREMNER, and BRIAN W. YOUNG. ¹ H N.M.R. Investigations on the Structure of Sheep Metallothioneins	217
Z. VOGEL, T. MIRON, M. ALTSTEIN, and M. WILCHECK. Spontaneous Inactivation of Enkephalin	226
PATRICK HALLENBECK. Purification and Properties of a Peptic Heme Peptide from Cytochrome <i>c</i> ₁	234
MANJU RAY and AMAR BHADURI. UDPglucose 4-Epimerase from <i>Saccharomyces fragilis</i> : Asymmetry in Allosteric Properties Leads to Unidirectional Catalysis	242

CARLOS SOLER-ARGILAGA, ROBERT L. RUSSELL, HAROLD V. WERNER, and MURRAY HEIMBERG. A Possible Role of Calcium in the Action of Glucagon, cAMP and Dibutyl cAMP on the Metabolism of Free Fatty Acids by Rat Hepatocytes.	249
SUMIHIRO HASE, TOKUJI IKENAKA, and YOSHIO MATSUSHIMA. Structure Analyses of Oligosaccharides by Tagging of the Reducing End Sugars with a Fluorescent Compound.	257
CHARLES A. ELDRIDGE and HAROLD J. MOROWITZ. Histograms of Conductance Fluctuations Induced by Alamethicin in Black Lipid Membranes.	264
YASUYOSHI WATANABE, MOTOKAZU FUJIWARA, OSAMU HAYAISHI, TOMIO TAKEUCHI, and HAMAO UMEZAWA. 2,5-Dihydro-L-Phenylalanine: A Competitive Inhibitor of Indoleamine 2,3-Dioxygenase and Tryptophan 2,3-Dioxygenase.	273
KINJI TSUKADA, YASUKO SAWAI, JUNKO SAITO, and FUMIYASU SATO. Change of Ribonuclease H Activity from Rat Liver Nuclei by Thioacetamide: Preferential Increase in the Activity of Magnesium-Dependent Ribonuclease H.	280
KARL H. WEISGRABER, THOMAS P. BERSOT, and ROBERT W. MAHLEY. Isolation and Characterization of an Apoprotein from the d<1.006 Lipoproteins of Human and Canine Lymph Homologous with the Rat A-IV Apoprotein.	287
F. A. M. DE AZEREDO, W. D. LUST, and J. V. PASSONNEAU. Guanine Nucleotide Concentrations <i>in Vivo</i> in Outer Segments of Dark and Light Adapted Frog Retina.	293
YOSHIYUKI KAMIO, MASAKI ISHIHARA, and YOSHIRO TERAWAKI. Alteration of Flagella by a Temperature Sensitive R Plasmid Rts1 in <i>Escherichia coli</i> K-12.	301
IRVING P. CRAWFORD, MONIQUE DECASTEL, and MICHEL E. GOLDBERG. Assignment of the Ends of the β -Chain of <i>E. coli</i> Tryptophan Synthase to the F ₁ and F ₂ Domains.	309
CARMENZA DUQUE, MASUO MORISAKI, NOBUO IKEKAWA, MIKIO SHIKITA, and BUN-ICHI TAMAOKI. The Final Step of Side-Chain Cleavage of Cholesterol by Adrenocortical Cytochrome P-450(scc) Studied with [22- ¹⁸ O]20,22-Dihydroxycholesterols, [¹⁸ O]Isocaproaldehyde, [¹⁸ O]Water and Atmospheric [¹⁸ O]Oxygen.	317
ROBERT A. MACLEOD and MARGARET GOODBODY. Translocation of Lipopolysaccharide in the Cell Wall of a Gram-Negative Marine Bacterium.	326
AKIRA KAMEI, NORIKO TAKEUCHI, SHUZO AKASHI, and KOSHIRO KAGABE. Structure of Extracellular Polysaccharides of <i>Escherichia coli</i> Strains 36M, 72M and 29M Isolated from Coligranuloma of Chick Intestine: III. Polysaccharide from <i>E. coli</i> 72M.	335
J. R. LEPOCK, J. E. THOMPSON, J. KRUVV, and D. F. H. WALLACH. Photoinduced Cross-linking of Membrane Proteins by Fluorescein Isothiocyanate.	344
LUZ M. CALLE, PAUL D. SULLIVAN, MARY D. NETTLEMAN, IGNACIO J. OCASIO, JOHN BLAZYK, and JOSEPH JOLLIICK. Antioxidants and the Mutagenicity of Benzo(a)Pyrene and Some Derivatives.	351
H. MARQUARDT, S. BAKER, B. TIERNEY, P. L. GROVER, and P. SIMS. Induction of Malignant Transformation and Mutagenesis by Dihydrodiols Derived from 7,12-Dimethylbenz[a]-Anthracene.	357
N. R. KRISHNA, JERRY L. DALLAS, ED S. MOOBERRY, TED T. SAKAI, RICHARD C. ALLEN, GEORGE C. LEVY, and JERRY D. GLICKSON. Conformational Flexibility of Bleomycin-A ₃ : A Carbon-13 Spin-Lattice Relaxation Time Study.	363
MICHELE VEDEL, FRANCOISE LAWRENCE, MALKA ROBERT-GERO, and EDGAR LEDERER. The Antifungal Antibiotic Sinefungin as a Very Active Inhibitor of Methyltransferases and of the Transformation of Chick Embryo Fibroblasts by Rous Sarcoma Virus.	371
EMMANUEL JOVER, NICOLE MARTIN-MOUTOT, FRANCOIS COURAUD, and HERVE ROCHAT. Scorpion Toxin: Specific Binding to Rat Synaptosomes.	377
KAROLY NAGY. Photoelectric Activity of Dried, Oriented Layers of Purple Membrane from <i>Halobacterium halobium</i>	383
SANDRA BORDIN, JUDY LEWIS, and PHILIP H. PETRA. Monospecific Antibodies to the Sex Steroid-Binding Protein (SBP) of Human and Rabbit Sera: Cross-Reactivity with Other Species.	391
ELIZABETH K. BARBEHENN and BERNARD T. KAUFMAN. Activation of Chicken Liver Dihydrofolate Reductase by Tetrathionate.	402
HENRY J. POWNALL, QUEIN PAO, MICHAEL ROHDE, and ANTONIO M. GOTTO. Lipoprotein-Apoprotein Exchange in Aqueous Systems: Relevance to the Occurrence of APOA-I and APOC Proteins in a Common Particle.	408
FUYUHIKO INAGAKI, TATSUO MIYAZAWA, MASANAO MIWA, HAZIME SAITO, and TAKASHI SUGIMURA. NMR Analyses of Conformation of Ribosyl Adenosine 5',5''-Bis-(Phosphate) in Aqueous Solution.	415
CHOY-L. HEW, NELSON LIUNARDO, and GARTH L. FLETCHER. <i>In Vivo</i> Biosynthesis of the Antifreeze Protein in the Winter Flounder — Evidence for a Larger Precursor.	421
JOACHIM KRUPPA and OSKAR H. W. MARTINI. Dephosphorylation of One 40S Ribosomal Protein in MPC 11 Cells Induced by Hypertonic Medium.	428
DOLPH HATFIELD, MARY RICE, and ELLEN HOFFMAN. Patterns of Codon Recognition by Isoacceptor Amino Acyl-tRNAs from Hymenoptera.	436
HIDEO NISHIGORI. An Analysis of the MPB-Arrested Stage during Replication of Vaccinia Virus in HeLa Cells.	445
GHAZI A. DANNAN, ROBERT W. MOORE, LAWRENCE C. BESAW, and STEVEN D. AUST. 2,4,5,3',4',5'-Hexabromobiphenyl Is Both a 3-Methylcholanthrene- and a Phenobarbital-Type Inducer of Microsomal Drug Metabolizing Enzymes.	450
EIKO TSUCHIYA, SAKUZO FUKUI, YUJI KAMIYA, YOJI SAKAGAMI, and MASAHIKO FUJINO. Requirements of Chemical Structure for Hormonal Activity of Lipopeptidyl Factors Inducing Sexual Differentiation in Vegetative Cells of Heterobasidiomycetous Yeasts.	459
KENNETH R. HUFF and GORDON GUROFF. Epidermal Growth Factor Stimulates the Phosphorylation of a Specific Nuclear Protein in Chick Embryo Epidermis.	464
EIKO TSUCHIYA and SAKUZO FUKUI. Binding of Rhodotorucine A, a Lipopeptidyl Mating Hormone, to a Cells of <i>Rhodospiridium toruloides</i> for Induction of Sexual Differentiation.	473
J. WIETZERBIN, S. STEFANOS, M. LUCERO, E. FALCOFF, D. C. THANG, and M. N. THANG. Presence of a Polynucleotide Binding Site on Murine Immune Interferon (T-Type).	480

KALINDI DESHMUKH-PHADKE, MICHELE LAWRENCE, and SUSAN NANDA. Synthesis of Collagenase and Neutral Proteases by Articular Chondrocytes: Stimulation by a Macrophage-Derived Factor.	490
B. ELLEN FRIEDMAN and KATHLEEN S. MATTHEWS. Inducer Binding to <i>LAC</i> Repressor: Effects of Poly[d(A-T)] and Trypsin Digestion.	497
BENNETT L. HAUSTEIN, JR., and DAVID R. McMILLIN. On the Reconstitution of Laccase from the Chinese Lacquer Tree.	505
ANDREAS TSAPIS, JOELLE THILLET, and JEAN ROSA. Studies on the Subunit Dissociation of Deoxyhemoglobin using Hemoglobin-Haptoglobin Interactions.	511
ANNOUNCEMENT.	517

Information for Contributors

BIOCHEMICAL AND BIOPHYSICAL RESEARCH COMMUNICATIONS is devoted to the rapid dissemination of timely and significant observations in the diverse fields of modern experimental biology. Manuscripts submitted should be so written as to emphasize clearly the novel aspects of the information reported.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be published nor is presently submitted elsewhere, and that all persons listed as authors have given their approval for the submission of the paper; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in BIOCHEMICAL AND BIOPHYSICAL RESEARCH COMMUNICATIONS represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Manuscripts in duplicate may be sent to any one of the editors whose names and addresses are listed on the inside front cover. To assist us in ensuring rapid processing of your article, please submit a signed photocopy of the copyright assignment form which appears as page 3 of this "Information" along with your manuscript. (This form will not be binding if your manuscript is not accepted for publication in BBRC.)

To ensure rapid and accurate publication, it is essential that manuscripts conform to the instructions which follow. Manuscripts which are not in accordance with these specifications may be returned.

Preparation of Manuscripts

Article length should not exceed 5 typewritten pages, double-spaced on 8.5 X 11-in. high-quality paper (the complete manuscript, including space occupied by figures and tables, should not exceed 8 pages).

Summary. Each article must be preceded by a brief summary, typed single-spaced, not exceeding 10 lines (approximately 100–150 words). This paragraph should adequately summarize the pertinent findings of the paper.

Typing. Articles are reproduced directly from the submitted manuscript as camera-ready copy. Manuscripts must therefore be typewritten on good quality white bond paper. A black silk or carbon typewriter ribbon should be used. Special care should be taken to ensure a sharp clean impression of letters throughout. Use of an electric typewriter is strongly recommended. Erasures should be avoided. Care must also be taken to avoid errors in spelling, word division and punctuation. **No changes may be made in manuscripts after acceptance.**

Manuscripts should be double-spaced on one side of the sheet; **methods, references, footnotes and figure legends should be single-spaced.** Typing area of the page must be as close as possible to 6.5 in. wide and 9.5 in. long.

Symbols and Abbreviations defined in the IUPAC-IUB Document No. 1 (*Arch. Biochem. Biophys.* (1966) **115**, 1–12) may be used without definition. Use of all other abbreviations and symbols is to be avoided. When abbreviations are essential, they should be consistent with the form and style of the above document and **must be defined in a single footnote and typed on a separate page**, rather than in the text. Such abbreviations **must not** be used in the Summary.

Enzyme names should not be abbreviated except when the substrate has an approved abbreviation (e.g., ATPase). Use the Enzyme Commission ("EC") code number when available.

Isotopes should be styled following the recommendations of the IUB Commission of Editors of Biochemical Journals. The symbol of the isotope introduced should be placed in square brackets directly attached to the front of the name (e.g., [³²P]CMP). Note that the isotope number should only be used as a (superior) prefix to the atomic symbol, not to an abbreviation.

In the Methods section, authors should draw attention to any particular chemical or biological hazards that may be involved in carrying out the experiments described. Any relevant safety precautions should be described; if an accepted code of practice has been followed, a reference to the relevant standards should be given.

For further information regarding nomenclature authors are advised to consult the Instructions to Authors of the **Archives of Biochemistry and Biophysics** (1978) **185**, i-xix. Reprints are available from the Publisher.

Footnotes, references, and figure legends should be typed single-spaced on separate pages.

Illustrations and Tables. **Do not attempt to insert figures, figure legends or tables into the text.** This will be done by the Publisher.

All drawings should be clearly labeled in black ink in a manner suitable for direct reproduction (Leroy lettering size 120 or 140). Do not use press-on lettering; typewritten lettering is not acceptable.

Figures will be reduced to fit within the type area of the page (approximately 5 X 8 in.); the original drawings should be no larger than 8.5 X 11 in.

Glossy photographs of drawings are acceptable provided they are sharp, clear prints with an even *black* density.

Mathematical or chemical symbols that cannot be typed should be inked in carefully in black. Structural formulas should be drawn in black ink.

Illustrations and tables should be submitted on separate sheets.

Page Numbers and Headings. Page numbers should be typed at the top of the page.

The title of the paper should be typed in capital letters near the top of the first page, with the name(s) and affiliation(s) of the author(s) typed just below. Headings within the article should be arranged according to their relative importance.

References to the literature should be cited by the number in parentheses in the text and listed in numerical order in a single-spaced typed list placed at the end of the manuscript. Abbreviations of journals should conform to those of *Chemical Abstracts Service Source Index, 1969*. Note the following examples.

For a journal article:

1. Chattorai, D. K., and Bull, H. B. (1971) Arch. Biochem. Biophys. 142, 363-370.

For a book by one or more authors:

2. Robinson, G. A., Sutherland, E. W., and Butcher, E. (1971) Cyclic AMP, pp. 298-302, Academic Press, New York.

Note that inclusive pagination must be given.

Acknowledgment of Receipt. Authors desiring acknowledgment of receipt of manuscript should enclose a stamped self-addressed card.

Reprints. Reprint order forms, with price lists, are sent to the authors immediately upon acceptance of their manuscript.

BIOCHEMICAL AND BIOPHYSICAL RESEARCH COMMUNICATIONS

Manuscript Title _____

Authors _____

I hereby confirm the assignment of all copyrights in and to the manuscript named above in all forms and media to Academic Press effective if and when it is accepted for publication by Academic Press. (For U.S. government employee authors, this provision applies only to the extent to which copyright is transferable.) I also confirm that the manuscript contains no material the publication of which would violate any copyright or other personal or proprietary right of any person or entity, and I acknowledge that Academic Press is relying on this letter in publishing this manuscript.

Date

Signed

Name (and title if not author)

To be signed by at least one of the authors (who has obtained the assent of the others, if any). In the case of a "work made for hire" (a work prepared by an employee within the scope of his or her employment or commissioned as a work for hire under a written agreement), an authorized representative of the employer should sign.

Please note: Manuscripts cannot be processed for publication until the Publisher has received this signed form.

If the manuscript is not published by Academic Press, this letter will not take effect.
